

Honors Economics

Course

Students will learn about Economic both as an academic discipline and as a skill for advancing real life goals. Honors Economics will focus personal finance, theory and policy. Students will then apply this knowledge during in-class debates, projects and assignments. This course is divided into six themes that cover the full spectrum of economics as a whole

The course is divided up by the following themes:

- Theme 1 Personal Finance
- Theme 2 Economics and Market Structures
- Theme 3 Supply and Demand
- Theme 4 Business and Labor
- Theme 5 Monetary and Fiscal Policy
- Theme 6 Global Economics

Textbooks

McGraw/Hill. *Understanding Economics*.

Expectations

This course will emphasize economic thinking, that is, understanding interactions in terms of exchange. This involves learning how to observe the world as an economist would, and analyzing the lived experience by applying economic models and theories. Literacy and numeracy are integral aspects of economics as a discipline. Consequently, students can expect to be stronger in both literary and mathematical skills by the end of the semester.

Students will be expected to complete all assignments on time and as directed. Late assignments will not be graded and the student will receive a zero (See Late Policy on the website). In the event of an absence the school make-up policy will be strictly enforced. Students will have one class day for every excused day absent, plus one day to make up the work. This only applies to excused absences. Work will not be accepted for unexcused absences. Note: there will be no exceptions for “computer glitches,” “corrupted files,” “lost e-mails,” etc. It is your responsibility to make sure your computers are in working order, and keep back-up files in case of a technological problem.

In the event of a field trip, the student is expected to check Google Classroom for any missed work. All assignments and materials can be found on the website. The student is required to turn in the work on time.

Students will keep a college composition book for this class. Many college professors require the use of composition books. In the composition book students are required to keep at least the following: Any notes, taken in class, or self-guided, daily learning objectives and exit slips. Composition books will be graded periodically for quality and completion. Notes will be graded during each test. If the student does not have his or her composition book at these times, a zero will be entered.

This class is divided into 6 themes. Each theme will be tested independently. The tests will be designed to assess higher order thinking skills. Tests are NOT open book or open note. Students should prepare for tests by attending class, taking good Cornell notes, reading the text and studying before the test. Cramming for these tests will not lead to success.

Pacing**

Theme1: Personal Finance Chapter 19

January 9: Classrooms Rules, Expectations and Procedures
January 13-15: Personal Finance and Consumerism
January 17: Financial Institutions and Your Money
